

new atlas

Refrigerated counters – Depth 600

The new range of "NEW ATLAS" freezer and refrigerated tables, available with a depth of 600 mm, is designed and manufactured to the highest quality standards. The tables are provided with electrical defrosting system by heating elements and with a device for automatic elimination of condensate water.

They are also available with built-in condensing unit or prearranged for a remote condensing unit with a valve system, in a normal and low temperature solution.

Equipped with 2, 3 or 4 doors, with the possibility of installing drawer units with 2 drawers. Accessories provided: 1 rack per door.

Prearranged to be installed on plinth.

Counters available with 10/10 thickness stainless steel normal worktops or with rear riser.
